Information Security Policy

Purpose

To establish management direction and support for information security in accordance with business requirements and ISO/IEC 27001.

Scope

Applies to all employees, contractors, and third parties who access organizational information systems or data.

Policy Statements

• Information shall be protected against unauthorized access, disclosure, modification, or destruction.
• Security controls shall be selected based on risk assessment.
• Compliance with legal, regulatory, and contractual obligations shall be ensured.

Responsibilities

• Management: Provide governance and resources.
• IT Security: Implement and monitor controls.
• Employees: Protect organizational information.

Compliance

Non-compliance may result in disciplinary action or legal consequences.
